Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 18 claims.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement, which has been reviewed by the Examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, and 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Frank (Pat No 1,331,427).

The instant claims recite a connector having three sections, and a suction cup having a knob receiving the one of the three sections.

The patent to Frank shows a connector (4) having three sections (one attached to element 2, one attached to element 3 and one in the middle), and a suction cup (3) having a knob receiving one of the sections of the connector. The connector shown by Frank is capable of supporting a discharge nozzle, and the suction cup of being supported on a

sink. As to the method claims, the device shown by Frank can be used following the recited steps.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank. The angle at which the middle portion of the connector extends, as well as its dimensions are considered to be obvious matter of engineering choice to those skilled in the art having no effect on how the invention is being used.

Claims 5, and 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank in view of Thorne et al. (Pat No 5,492,739).

The patent to Thorne et al. shows a suction cup (11) having a knob portion (15) and a connector defining a hook portion (19) to be received to the knob portion of the suction cup. It would have been obvious to one skilled in the art at the time the invention was made to have provided the connector shown in Frank with a hook portion as show by Thorne et al. as an alternative engaging means which is easy to use.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Philipps et al. (5,028,026), Zelinger (5,148,769), Protz, Jr (5,595,364), Lian (6,669,033), Adams, IV (2001/0040202 A1) and Dretzka (2003/0201369 A1) all show brackets comprising a connector and a suction cup.
